ABOUT US

More than 10 years of industry experience

CT Mobility is a UAE-based technology company specializing in shared mobility and corporate car sharing.

Our platform combines centralized fleet management with branded iOS and Android apps. Employees can book and access vehicles digitally, while companies control usage, monitor operations and improve vehicle utilization.

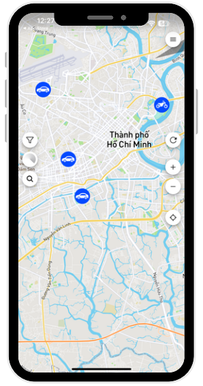
BOOKING WORKFLOW

How Employees Book and Use a Vehicle

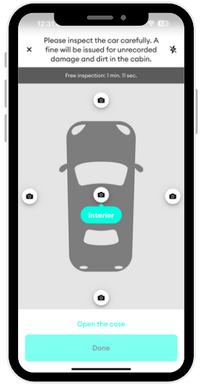
01
Employee Onboarding

Download the company app, sign in and receive booking permissions.



02
Find & Book

View available vehicles and book one for the required time.

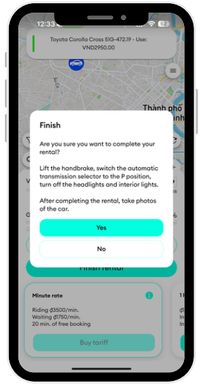


03
Inspect & Unlock

Check the vehicle, report existing damage and unlock it through the app.

04
Start the Trip

Use the vehicle within the company's access rules. Trip data is recorded automatically.



05
Return & Complete

Return the vehicle, complete the inspection and end the booking in the app.

TRANSFORM YOUR CORPORATE FLEET

Key Benefits

01

Higher fleet utilization

Increase vehicle utilization through shared access and a fast, fully digital booking process.

02

Automated fleet operations

Manage bookings, users, vehicle access and trips within one platform.

03

Lower administrative costs

Eliminate manual vehicle handovers with keyless access and self-service rentals.

TRANSFORM YOUR CORPORATE FLEET

Key Benefits

04 **Real-time fleet visibility**
Monitor vehicle locations, availability and status in real time.

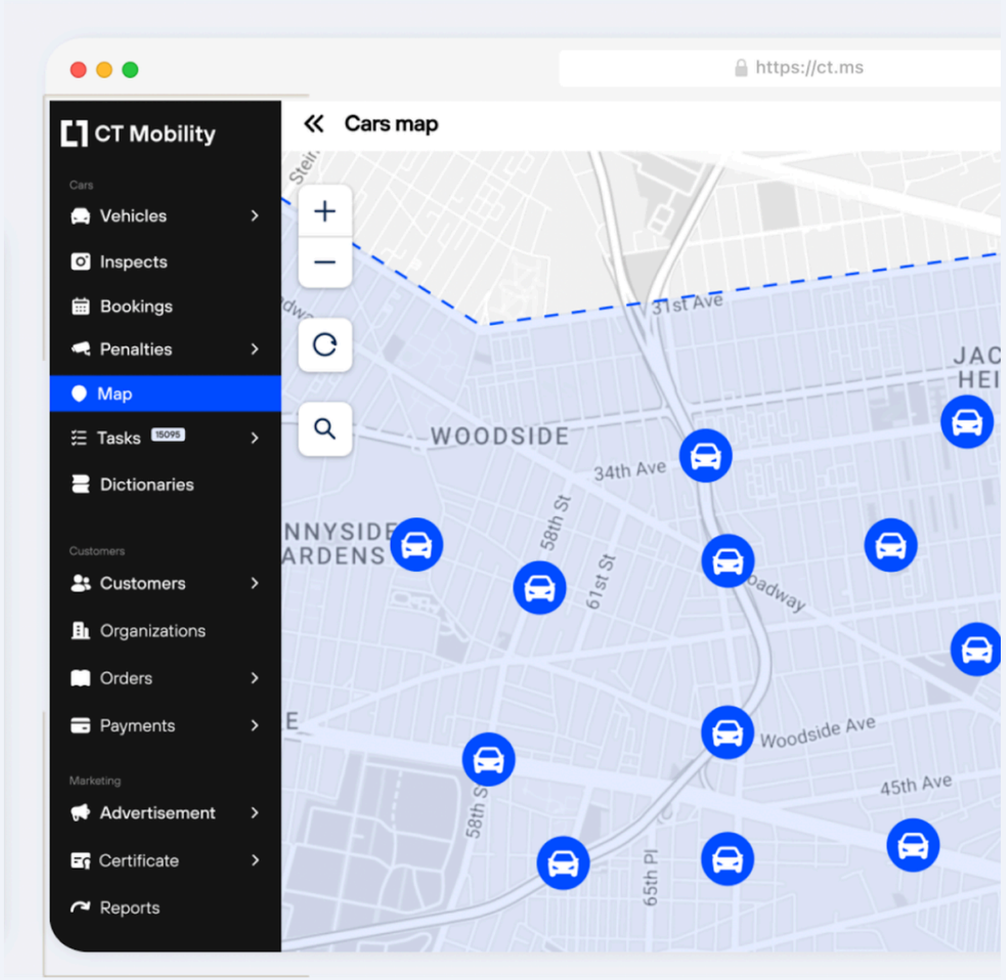
05 **Digital vehicle inspections**
Employees document vehicle condition, damage and technical issues before and after each trip.

06 **Lower operating costs**
Detect maintenance issues, low fuel levels, towing events and suspected theft earlier.

07 **Safer driving**
Monitor driving behavior to reduce accidents, vehicle damage and unauthorized use.

08 **Analytics and automated reporting**
Access transparent data on users, trips, mileage, utilization, fuel, incidents and traffic violations.

09 **Easy access for employees**
Employees can find, book and access available vehicles directly through the mobile app.



EVERY TRIP, FULLY DOCUMENTED

All Trip Data in One Place

Access a complete history of every vehicle and trip through a single platform.

- Employee who booked the vehicle
- Trip start and end time
- Route and mileage
- Total trip duration
- Reported damage and technical issues
- Vehicle condition photos
- Driver comments and trip details

Flexible Access Rules: set permissions by employee, department, vehicle, day and time.

ALL-IN-ONE SOFTWARE

Everything You Need to Manage Your Fleet

White-Label Mobile App

A branded iOS and Android app for employees to find, book, access and return vehicles.

Fleet Management System

A centralized dashboard for managing vehicles, users, access permissions, bookings, trips, fuel consumption and maintenance, with real-time analytics.

End-to-End Support

Hardware integration, platform setup, onboarding, software updates and ongoing technical support.

PRICING

Simple, Transparent Pricing

AED 50

PER VEHICLE PER MONTH

- White-label mobile app
- Fleet management platform
- Technical support
- Unlimited users
- Software updates

BILLED SEPARATELY

- Cloud hosting and server infrastructure
- SMS notification fees
- Telematics hardware and installation
- M2M SIM cards and mobile data

No setup fee or per-user charges. AED 500 minimum monthly subscription.

HARDWARE & CONNECTIVITY

Telematics Hardware

Billed separately from the subscription: hardware and installation once per vehicle, data yearly.

ONE-TIME

GPS tracker

Teltonika FMC130

AED 160

per vehicle

Location, trips, mileage and engine cut-off control.

IF REQUIRED

CAN adapter

Teltonika LV-CAN200

AED 195

per vehicle

Central locking and extra vehicle data, simpler connection.

ONE-TIME

Installation

FMC130 + LV-CAN200

AED 250

per vehicle

Engine cut-off, central locking connection and integration.

YEARLY

SIM & data

M2M SIM card

AED 240

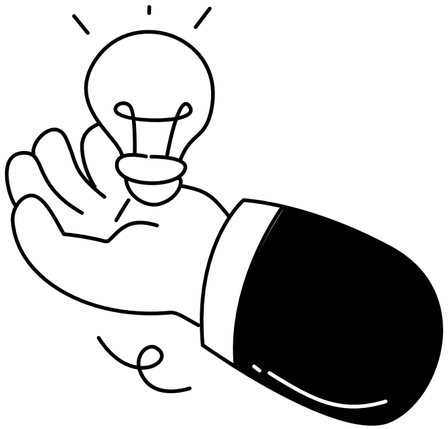
per vehicle per year

Mobile data for the tracker, renewed every year.

The CAN adapter depends on the vehicle make, model and required functions; each model starts with a CAN review. Final hardware quote after vehicle review.

LAUNCH PROCESS

Go Live in Just 15 Days



Step 01 – Demo

Explore the platform and define the right setup based on your vehicles, employee mobility needs, usage zones and booking workflows.

Step 02 – Agreement

We finalize the commercial terms, sign the agreement and help you select compatible telematics hardware for your vehicles.

Step 03 – Setup

We configure the platform and mobile app, connect the vehicles, test the system and support your launch.

PILOT PROGRAM

Try It Free for 3+ Months

We can connect 2 of your vehicles to our software free of charge, so you can use it as a pilot for 3 months or more and see every advantage in practice, in real operating conditions.

2

VEHICLES

connected to the software free of charge

3+

MONTHS

of pilot use in your real day-to-day operations

WHAT YOU GET

- Full access to the branded app and fleet management platform
- Real trips with your own employees and vehicles
- Usage data to measure utilization and savings
- Setup, onboarding and support from our team

Evaluate the platform before a long-term decision. Hardware, installation and mobile data are not included.
